

# Extended Mekong Delta- Modelling of Inundation and Sea Level 2004

1:1.000.000

## Legend

Inundation Modelling	Basic information
13 m	!
0.5 m	National boundary

## Data Sources

- Background Image © True Marple, Unearthened Outdoors, LLC
- River Network © Sub National Institute for Agricultural Planning and Projection (Sub-NIAPP), 2000

## Scale / Reference System

0 20 40 60 80 km  
Scale: 1:1.000.000

## Interpretation

The map displays and compares the flood maximum extension for the whole MK Delta. Inundated areas where modeled by using a suitable method for interpolating result from a 1D hydraulic model. The flood year 2004 was used for the simulation under the assumption of 45cm rise of sea level.
